Worksheet 6 Year 1

Maths task: Halving numbers or dividing by 2.

Today you will be splitting one large group into two smaller groups. This is called halving. When we split something into two we make two halves. Try and see if you can split the below groups into half.

Tip: Count how many there are in the group. Make that group yourself using some counters, LEGO, pasta etc. and share them into two groups. What number do you have in each smaller group?

2 groups of _____

Half of 6 is _____

2 groups of _____

Half of _____ is _____

2 groups of _____

Half of _____ is _____

When we halve numbers we can also say we are dividing by 2. They are the same thing. Now try halving the numbers below in the part wholes. Use your equipment to help. The first one has been done for you.
