Worksheet 8 Year 1

Maths Task: Dividing by 2.

We found out that dividing by 2 is the same as halving and that you have to have 2 equal groups. We have investigated what numbers you can and cannot divide by 2 and hopefully found out that you can divide even numbers by 2 but not odd numbers.

Task: Go on a hunt around your house, in the garden or on a walk and make groups of even numbers. Then divide these groups by 2. Once you have done that try using the divide symbol (÷) to write a number sentence to match your working out.

Here is an example:

I had 6 lolly pops. I divided them by 2 to make two groups of 3.

My number sentence would be : 6 ÷ 2 = 3

Now try for yourself, using the space below to write your number sentences.
