Worksheet 12  29.6.20  Year 3 Be Curious

Build your own skeleton!!

You'll like this activity! You are going to build a skeleton using equipment.

Have a look at the photograph below and everything will become clear!

As you can see, you can build your skeleton using cotton buds as obviously they are shaped a bit like bones. If you haven't got cotton buds, anything similar would be just as good!  You can just do this on a table or on the floor!

Make sure you have a reasonably accurate skeleton as you don't want any missing parts!

When it is complete, take a photograph of your finished skeleton!
