Worksheet 12

Watch the following video that explains about food chains.

https://www.youtube.com/watch?v=FFloV2J-eKI

Your task: Create a simple food chain. Choose a producer, a primary and a secondary consumer.

Cut an A4 sheet of paper into 4 rectangles.

On one rectangle draw the sun. The sun is the start of all food chains. It provides energy to the plants.

On the other three rectangles, draw a producer, a primary consumer, and a secondary consumer.

Use string to join them together to make your own food chain.

Be as creative as you like! You could make a longer food chain, or even create a food web!
