

Wb 20.4.20 Spring Weaving

Use different coloured strips of paper, ribbon or string (which ever items are available to you) to weave a pattern onto an Spring Chicken egg. The egg template below can be printed or drawn on to paper or you can create any different shape you want to use.

If using the template, get your child to cut carefully around the egg and then an adult can fold the egg and cut along the lines as pictured. →

Then use the strips of paper/ribbon/string etc to weave under and over the cuts in the egg. Can you use different colours to make a repeating pattern?

When finished, stick the paper strips down with glue or sticky tape and cut off the excess strips.

This activity helps to develop fine motor skills by using scissors and carefully weaving in and out.
