

Worksheet 10a Year 1

Maths Task: Division. For this task you will need to use sheet 10b (food division). On each card there is a question that requires sharing food equally into groups. You could use some practical resources to help you do this.

If you are feeling creative you could make your own food items by drawing and cutting out the items. As a group or family you may want to have a division picnic where the items of food you have made are split equally between you all.

You may also choose to help serve lunch, making sure everyone has equal amounts of each item. This may include sandwiches, carrot sticks, fruit, packets of crisps and cups of water. (Please make sure you wash your hands well before taking part in this activity.)

Have fun and try not to eat anything until you've done sharing!
