

Worksheet 5

We do a lot of problem solving in maths. Can you solve these problems? Remember that you will have to use a calculation to help you, maybe even two calculations? Try to use the methods that we have taught you in class.

I am making 460 loaves of bread. I have to give 21 to the homeless in London, 56 to the NHS workers, 97 to the children. How many loaves of bread do I have left?

There are 108 houses on Pudding Lane. If half of them burn down, how many will be left?

I have four parcels of cheese and 8 parcels of wine. I have to share my belongings between 3 carriages, how many parcels will be on each carriage?
