

## Worksheet 2

### **The Great Fire of London**

Are these questions true or false?

	true	false
They couldn't carry water fast enough to put the fire out.		
The streets were wide.		
A strong wind blew the flames to other houses.		
The buildings were mostly made of stone.		
There had been no rain, so London was very dry.		
The water squirters were too weak to quench the flames.		
The buckets were made of leather.		
The buildings were very far apart.		
There was no fire brigade in 1666.		
The buildings were mostly made of wood.		
The fire started in Bread Lane.		
The people fled to boats on the river.		
It was raining that day.		
The buildings were very close together.
