

Read the problems carefully. You will need to use your perseverance and resilience character muscles. If at first you don't succeed, try, try, try again!

Maths Mastery - Number and Place Value Challenge Cards

7. Choose 4 numbers to go at the bottom. Zero is not allowed. Add each adjacent pair and put the number in the circle above. Then add those two numbers and write the answer above. Can you make sure the last 2 numbers add to total 15?

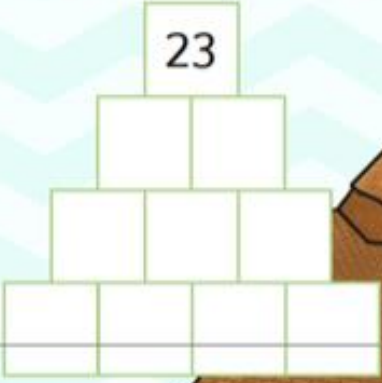

So I add numbers that are next to each other up to make the number above.

15 isn't a big number, so I think I'll use 1 digit numbers like 1 and 2 at the bottom.

Number Pyramid

If 23 is at the top of the pyramid, which four numbers would be at the bottom?

Add the pairs of numbers to reach the top.

So I add numbers that are next to each other up to make the number above.
