

This week, you're going to be studying a plant and sketching it. If you can, go outside and find a plant to sketch or find one in your house. If you can't, have a look at some of the images below and choose one or two to copy in your own sketching style.

Like the last time you sketched, use the skills you have already been taught. Do some shading to give your sketch some depth and bring it to life.

If you like... when you have sketched the plant, you could paint one too.

Sketch in this frame.

Have a look at these and choose one or two to sketch.
