SHQ: How do we create actor profiles?

One of the features of a movie that helps to make it highly successful is the cast. The actors are the people who have to bring the story and the script to life. Often, well-known actors are brought in to films because they are popular and this can help sell tickets at the cinema. However, actors have to start somewhere; even the most famous actors were given small roles in films that they probably want to forget now!

The aim of this task is for you to create a superstar. You will do this by constructing their profile, which is really a short version of a biography.

A format for your profile is included below; it contains the following elements:

- A space for a picture (this can be important depending on what the film is about)
- Details about how the actor trained (e.g. at an arts school, in local theatre, radio, first films etc.)
- The actor's recent roles and their most famous work
- Some details about the actor's personal life that might persuade a director to use them in their film (e.g. interests, other skills, family life, charity work, awards etc.)
- A closing statement (a few sentences about why they love acting and the reasons that they should be included in the film)
